PROFILE

Web Developer with 1+ years of professional experience in developing and maintaining dynamic web applications using PHP and MySQL. Proficient in backend development, database management, and creating efficient, scalable solutions. Passionate about front-end technologies and currently enhancing expertise in React.js to build modern, responsive, and interactive applications. Strong problem-solving ability, quick learner, and dedicated to writing clean, maintainable code while contributing effectively in team-based environments.

WORK EXPERIENCE

Shwasthik Technologies

Web developer

2024 - Present

- Developed and maintained dynamic web applications using PHP and MySQL.
- Designed and optimized relational databases to improve performance and scalability.
- Collaborated with cross-functional teams to deliver responsive and user-friendly solutions.
- Integrated APIs and third-party services to enhance application functionality.
- Gained exposure to React.js, building interactive front-end components and learning modern JavaScript practices.

PROJECTS

- Personal Portfolio Website – Built a responsive portfolio using React.js, CSS, and JavaScript, applying modern UI/UX design principles with cross-browser compatibility.
- Image Search Engine – Developed a React.js-based image search platform, enabling users to efficiently search and discover images with an intuitive interface.
- Bus Pass Management System (UG Project) – Created a full-stack web application using PHP, MySQL, and HTML with features like user registration/login, admin dashboard, and bus pass application management.

TECHNICAL SKILLS

- Programming & Scripting: PHP, JavaScript, Python (Basic)
- Frontend Development: HTML5, CSS3, React.js, Bootstrap
- Backend & Database: MySQL
- Other Tools: Git, VS Code.

SOFT SKILLS

- Design Thinking
- Video & Image Editing
- Problem-Solving
- Quick Learner
- Strong Communication

LANGUAGES

- Tamil (Fluent)
- English (Fluent)

Billing Management System

- Technologies: PHP, MySQL
- Developed a web-based billing system for invoice generation, payment tracking, and customer management using PHP and MySQL.
- Implemented responsive UI and optimized database performance for seamless user experience.

School Billing Management System

- Technologies: PHP, MySQL
- Built a responsive web application to manage student fees, generate invoices, and track payments.
- Utilized PHP for backend logic and MySQL for secure data storage and reporting.

Notification Reminder Web App

Technologies: PHP, MySQL, Firebase, JavaScript, HTML, CSS

- Developed a reminder web app with real-time push notifications using Firebase.
- Utilized PHP and MySQL for backend data management, user authentication, and scheduling reminders.
- Implemented cloud functions for dynamic, user-specific notifications and reminder alerts.
